

## Exploring Glass

"ok glass,"

★ "google..."

★ "take a picture"

★ "record a video"

★ "take note"

★ "find a recipe"

★ "translate this"

# Google

When Glass is asleep,  
tap side 3 times to get  
to Google search

## Search

Do a Google search in the moment. Get quick answers to questions ("What time is it in Singapore?"), useful facts ("Who wrote Peter Pan?"), translations ("How do you say 'hello' in Japanese?"), or quickly pull up images ("Pictures of dragon fruit").

Here are a few more search examples to get you started:

- ▶ Figuring out the tip for a birthday dinner: "What is 15 percent of 33 dollars?"
- ▶ Translating helpful phrases in other languages: "'How do you say 'how much is that?' in Chinese?"
- ▶ Finding out the definition of a word you might not know: "Define 'serendipity.'"
- ▶ Getting quick information: "When is the next winter solstice?"
- ▶ Finding restaurants in a particular location or city: "Restaurants in San Francisco"
- ▶ Pulling up images of a subject you might not be familiar with: "Pictures of Scottish Fold kittens."
- ▶ Finding out useful facts on the go: "Who directed 'Iron Man?'"
- ▶ Getting some helpful information on questions: "Why is the sky blue?"

Follow up on your previous searches to discover even more about your subject.

- ▶ Find out more: "When was *it* built?"
- ▶ Check your calendar for an appointment

## Take Picture

Tap once to wake up Glass  
"OK glass ... take a picture" OR

Click camera button on top of frame

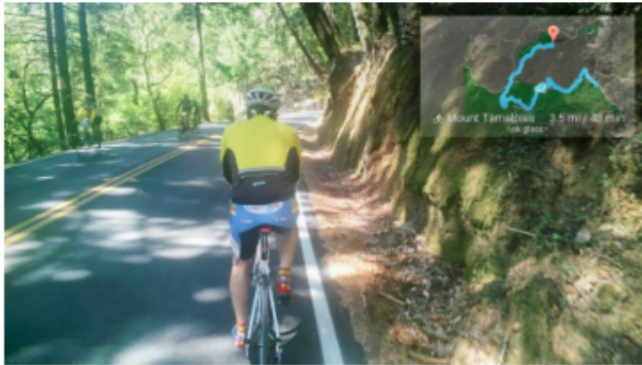

After you see the image,  
click on it and Share to G+ Friends  
(currently just Ms. Butler's school gmail)

"ok glass, add a caption"

## Make vignette

Vignettes superimpose a screenshot of your Glass display over a picture. You can share these around to show what you're doing on Glass while you're taking a picture. It's a sweet little snapshot of your experience on Glass.

To make a vignette:

1. Make sure the screenshot you want is active in your Glass display.
2. When you've lined up what you want on your display, press Glass's camera button.
3. Tap the touchpad and select **make vignette**.

To see the **make vignette** action, you'll need to have taken a picture via the camera button while your intended screenshot was active in your display. For this reason, the **make vignette** option is not available when taking a picture using voice actions or menu actions.

## Record Video

Tap once to wake up Glass      OR  
"OK glass ... record a video"

Hold the camera button on top of frame

Videos are automatically 10 seconds

After you see the video,  
click on it and Share to G+ Friends  
(currently just Ms. Butler's school gmail)

Send a Note

directly to Evernote

## Find a Recipe

Say your favorite food

It will search for recipes

Swipe to see choices

Tap to read the details (swipe for further steps)

Can anyone figure out the flaw with the recipe feature?
